BIOMEDICAL
EQUIPMENT REPAIR
TECHNOLOGY

MASTER PLAN OF INSTRUCTION
2018-2019
Ernest White, Instructor

MISSION
The mission of Fort Myers Technical College is to provide high quality career and technical training, in order to prepare students for current and emerging industries, delivered by a professional and caring staff in a positive learning environment.

The School District of Lee County does not discriminate on the basis of race, color, national origin, gender, age, disability, marital status, pregnancy, or genetic information in its educational programs, services or activities, or in its hiring or employment practices. The district also provides equal access to its facilities to the Boy Scouts and other patriotic youth groups, as required by the Boys Scouts of America Equal Access Act. Questions, complaints, or requests for additional information regarding discrimination or harassment may be sent to: Equity Coordinator, Fort Myers Technical College, 3800 Michigan Ave., Fort Myers, FL 33916, (239) 334-4544.

Lack of English language skills will not be a barrier to admission and participation. The district may assess each student’s ability to benefit from specific programs through placement tests and counseling, and, if necessary, will provide services or referrals to better prepare students for successful participation.

Fort Myers Technical College
3800 Michigan Avenue
Fort Myers, FL 33916
(239) 334-4544
INTRODUCTION
The purpose of this program is to provide students the opportunity for employment in a variety of
electronic/mechanical related occupations. After completing the 1140 hour program, students are prepared
to assemble, install, maintain, troubleshoot and repair biomedical equipment in the industry.

Materials used are self-paced which allow students to progress at their own pace. Competencies in each
area are completed after both written and performance testing.

PROGRAM MISSION
The mission of the Biomedical Equipment Repair Technology program is to prepare students for
employment as a biomedical electronics technician in the local community. With a broad knowledge base,
many areas of employment are possible. Students are encouraged to obtain Industry certification as a
Biomedical Electronics Technician (BMD) in Electronics Technicians Association, International (ETA).

PROGRAM PHILOSOPHY
This program is a combination of classroom instruction using the most up-to-date textbooks, computers,
software, and equipment available. The student is eligible to test for certification by the Biomedical
Electronics Technician (BMD), at Electronics Technicians Association, International. After completing
the Biomedical Equipment Repair Technology program, the student is prepared to enter the workforce as
Biomedical Electronics Technician.

PROGRAM CONTENT
- Demonstrate proficiency in Soldering and Basic Laboratory Practices
- Demonstrate proficiency in Basic Direct Current (DC) Circuits
- Demonstrate Employability Skills
- Demonstrate an understanding of Entrepreneurship
- Demonstrate proficiency in Knowledge of Basic Computer Usage
- Demonstrate proficiency in Advanced Direct Current (DC) Circuits
- Demonstrate proficiency in Alternating Current (AC) Circuits
- Demonstrate proficiency in Analog Circuits
- Demonstrate proficiency in Solid State Devices
- Demonstrate proficiency in Digital Circuits
- Demonstrate proficiency in Fundamental Micro-Processors
- Demonstrate appropriate understanding of Basic Math Skills
- Demonstrate an understanding of Basic Science Skills
- Demonstrate Skills in Technical Recording
- Demonstrate appropriate Communication Skills
- Demonstrate Proficiency with Transistor Pulse Amplifiers
- Demonstrate proficiency with Trigger Device Circuits
- Demonstrate proficiency with Operational Amplifiers
- Demonstrate proficiency in knowledge of Electromagnetics
- Demonstrate proficiency with Fiber Optic Applications
- Demonstrate proficiency in DC Motors Systems
- Demonstrate proficiency with Motor Control Systems
- Demonstrate an understanding of Safety Concepts and Best Practices
• Demonstrate appropriate understanding of The Human Machine
• Demonstrate an understanding of Monitoring Systems
• Demonstrate proficiency with Medical Support Equipment
• Demonstrate proficiency with Medical Monitoring Equipment
• Demonstrate proficiency with Motors
• Demonstrate proficiency with Power Systems
• Demonstrate proficiency with Laboratory Equipment
• Demonstrate proficiency with Sterilization Equipment
• Demonstrate an understanding of Biomedical Imaging Systems
• Demonstrate proficiency with Radiographic Imaging Systems
• Demonstrate proficiency with Magnetic Resonance Imaging Systems
• Demonstrate proficiency with Impedance Tomography Systems
• Demonstrate proficiency with Life Support Systems
• Demonstrate proficiency with Respiratory Systems
• Demonstrate proficiency with Cardio Systems
• Demonstrate proficiency with Renal systems
• Demonstrate proficiency with Incubators
• Demonstrate proficiency with Biomedical Optic Systems
• Demonstrate proficiency with Surgical Support Tools
• Demonstrate proficiency using Biomedical Information Systems
• Graphically illustrate an understanding of Anatomy
• Reinforce knowledge of Medical Terminology
• Demonstrate proficiency in Computer Communication
• Demonstrate understanding and knowledge of Electro/Mechanical Safety
• Demonstrate understanding in Building Wiring
• Demonstrate proficiency in Basic Radiographic Equipment
• Demonstrate proficiency in Film Processing
• Demonstrate proficiency in Test Equipment
• Demonstrate an understanding of Magnetic Resonance Imaging
• Demonstrate understanding and knowledge of Computed Tomography
• Demonstrate an understanding of Nuclear Medicine
• Demonstrate an understanding of Codes and Regulations Applications
• Demonstrate proficiency in Troubleshooting
• Demonstrate proper application of Radiation Safety
• Demonstrate an understanding and knowledge of Radiation Physics
• Demonstrate proficiency in Linear Accelerators
ESSENTIAL TRAINING TASKS

Physical Requirements
Student must have the following: good hand-eye coordination, able to grasp small objects, good manual dexterity, able to see colors, assemble objects and parts, and move freely to observe and evaluate projects.

Cognitive Requirements
Students must be able to follow written and oral instructions; interpret electrical schematics and mechanical drawings; have excellent communication and troubleshooting skills; be able to interpret test results to determine circuit faults; be a team player; and work well with others.

ACCOMMODATIONS
Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student’s IEP or 504 plan or post-secondary student’s accommodations plan to meet individual needs to ensure equal access. Post-secondary students with disabilities must self-identify, present documentation, required accommodations if needed, and develop a plan with their post-secondary service providers. Accommodations received in post-secondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology, and special communication systems. Documentation of the accommodations requested and services provided are maintained in a confidential file.

TUITION
Tuition is charged for adult students at a reasonable rate that may vary slightly from year to year and is due prior to the first day of each semester. Current fee information is available from Student Services. Tuition is waived for eligible high school dual-enrolled students. Failure to pay all fees due at the time class begins will result in the student not being able to attend class and/or clinical.

CLASS SCHEDULE
Daytime certificated classes meet Monday through Friday from 8:00 A.M. until 2:30 P.M. This amounts to 30 hours of classroom instruction per week. Lunch breaks are 30 minutes in length.

ATTENDANCE POLICY
In an effort to develop appropriate employability skills, FMTC students are expected to attend all class sessions. As is expected in the workplace, when it is necessary to be absent due to illness or emergency situations, all students are to notify the instructor on or before the date of absence. The student attendance policy for each post-secondary program is consistent with industry standards.

Campus attendance is kept via a computerized system. It is the responsibility of the student to log in and out in order to receive credit for class time. This allows the school to keep accurate attendance records for the actual number of hours and minutes attended.

All adult students are expected to be in attendance at least 90% of their scheduled hours during each semester. Adult students failing to maintain the 90% attendance standard may not be permitted to continue in their program and may be required to sit out one full semester, unless administration approves to waive the 90% standard based on special circumstances.
Absences
A student who is absent for 6 consecutive class sessions, without prior approval and without contact with the instructor, will be withdrawn from enrollment in his/her program. A student withdrawn for absenteeism must petition administration to return. Students exhibiting a pattern of consecutive absences of 4 days may be subject to dismissal as determined by a School Intervention Team. School Intervention Team meetings will be held as necessary to attempt to alleviate issues resulting in excessive absences and to counsel the student of possible alternatives and consequences.

Students, who are late for class, including returning late from lunch, must clock in. Students who leave school early must notify their instructor and clock out. This time out of class is recorded as time absent and is counted against the required 90% attendance. Excessive tardies or early departures will be reported to the Student Affairs Specialist and will result in a meeting with the School Intervention Team.

Adult students who know they will be out of school for an extended period of time (4 days or longer) may apply for a Leave of Absence from their program. A Leave of Absence will be granted only once during a twelve-month period. STUDENTS WHO EXERCISE A LEAVE OF ABSENCE MAY HAVE TO EXTEND THEIR TIME IN THEIR PROGRAM AND PAY ADDITIONAL FEES.

Leaving Campus During School Hours
Students must notify their instructor when leaving campus early. This is for the safety of students, to accurately track time, and to allow the instructor to best utilize instructional resources.

PLAN OF INSTRUCTIONAL PRACTICES

Teaching Methods
Teaching methods include lectures, demonstrations, hands-on training activities, online video training and presentations, virtual simulations, outside speakers from job-related businesses and industries, field trips, projects, co-op assignments with local businesses and manufacturing facilities.

Safety
Follow established electrical safety procedures and standards. No horseplay or unsafe conduct is acceptable.

Work-Based Activities
Work-based learning activities play an integral part of the curriculum of FMTC’s career-technical training programs. These activities are planned with two objectives in mind. First, the activity provides students with the opportunity to develop and apply ‘real world’ experience using the knowledge and skills attained in the program. Second, the activity provides the instructor with objective input from potential employers or customers of program graduates. Each work-based activity has a written instructional plan outlining objectives, experiences, competencies, and evaluation required during the activity.

Cooperative Education
Cooperative training is available for students and coordinated by the instructor and career specialist. Cooperative training is for students who have shown competence in program training that indicates readiness for placement in an on-the-job program. High school students participating in the cooperative job placement program must be in the 12th grade. To be eligible for a cooperative education experience, students must have completed one-half of the required program hours and requirements.

Students may be returned to the program for additional training if they do not function satisfactorily on the job or when the cooperative agreement is terminated at the request of the student, parent, employer, or program instructor. Veterans will be accepted in the program in accordance with the Department of Veterans Affairs approved program.

Additional information regarding cooperative training opportunities may be obtained from the program instructor or career specialist.
Job Shadowing
Job shadowing experiences, or volunteer experiences, are available to students as part of their program training. These experiences are designed to give the student actual hands-on experiences doing a variety of related tasks. Length and type of experiences will vary. The program instructor determines appropriateness of the experience. Additional information regarding job-shadowing experiences may be obtained from the program instructor or career specialist.

GRADING PROCEDURES
Student evaluations are based on a once-a-month Student Progress. This allows the student to know exactly where they are at any given point in time. The grading policy for the Biomedical Equipment Repair Technology program at Fort Myers Technical College is as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Percentage of Total Weekly Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Academic Progress – OCP’s Exams</td>
<td>60%</td>
</tr>
<tr>
<td>Attendance - Employability Skills</td>
<td>15%</td>
</tr>
<tr>
<td>Labs</td>
<td>25%</td>
</tr>
</tbody>
</table>

Each category is given a weekly grade and put into the focus grade book. The grades are recorded in Focus and included as part of the student’s permanent record.

Fort Myers Technical College is a post-secondary institute designed to provide trained individuals to industry. The approved post-secondary program grading requirements must be met if the student is to receive a certificate.

Program Progress
Students are required to complete the program of training within the hours allotted by the state of Florida for completion. Progress must be at a rate that will allow completion of the program with the number of membership hours stated in the Curriculum Frameworks.

Failure to progress at this rate will require the student to meet with the program instructor, career specialist, and an administrator in order to identify an appropriate completion point or to assist the student in selecting a more appropriate training program.

Work Habits
Effective work habits are the cornerstone to successful employment. Students are expected to demonstrate productive work habits during all phases of enrollment. Instructors will work with students who need assistance in this area to improve the overall possibility for successful employment.

**Attendance:** Attends class, arrives/leaves on time; begins and ends work as expected.

**Character:** Displays loyalty, honesty, trustworthiness, dependability, reliability, initiative, self-discipline, and self-responsibility; displays a high level of effort and commitment to performing and completing work.

**Teamwork:** Respects the right of others; respects confidentiality; is cooperative; is assertive; displays a customer service attitude; seeks opportunities for continuous learning; demonstrates mannerly behavior; encourages and facilitates cooperation, pride, trust, and group identity; fosters commitment and team spirit.

**Appearance:** Displays appropriate dress, grooming, hygiene, and etiquette; wears full regulation uniform.

**Attitude:** Displays a willingness to cooperate and accept constructive criticism; sets realistic expectations; approaches assignments with interest.
Productivity: Is prepared for class by reading assignments and completing homework; contributes to class discussions; and involvement in lab activities (in other words, no sleeping or daydreaming). Follows safety practices; conserves and maintains equipment and supplies; keeps work area neat and clean; follows directions and procedures; makes up assignments and tests punctually; notifies proper authorities of situations presenting potential safety hazards; does not use or knowingly permits others to use tools and equipment improperly; stays on task and utilizes time constructively.

Organization: Manifests skill in prioritizing and management of time and stress; demonstrates flexibility in adapting to changes.

Communication: Communicates accurate information to others in a professional and courteous manner; displays appropriate nonverbal (eye contact, body language) and oral (listening, telephone etiquette, grammar) skills; asks pertinent questions; listens attentively to others, notifies instructor in advance of absences or tardies.

SATISFACTORY ACADEMIC PROGRESS
In order to receive and continue to receive financial assistance of any type, a student must maintain satisfactory academic progress. The Financial Aid Advisor will require a progress report to be completed by the student’s instructor and submitted to the Financial Aid Office prior to each disbursement.

Students are considered to be making Satisfactory Academic Progress (SAP) if they successfully complete their scheduled clock hours, achieve a specific cumulative grade evaluation or grade point average (GPA), and do not exceed the maximum time limits to complete their course of study. Each Student Academic Progress will be checked at 450 clock hours and prior to subsequent disbursements for students enrolled in programs one academic year or greater. Progress will be checked at the half-way point for programs less than one academic year. No SAP is required prior to the first disbursement.

REQUIREMENTS FOR A CERTIFICATE
All competencies specified in the state of Florida Curriculum Frameworks for the program must be successfully completed. Successful completion is at least a 75% average in the areas of skills, knowledge, and work habits.

Proficiency in the competency standards listed in the Master Plan of Instruction must be demonstrated.

Students must meet minimum Test of Adult Basic Education (TABE) skill requirements (or be eligible for an exemption) prior to graduation.

In addition to the requirements above, the recommendation of the instructor for certification includes: consideration of employability skills, personal appearances, a willingness to learn and to work, punctuality, cooperative attitude, and appropriate work habits.

BIOMEDICAL EQUIPMENT REPAIR TECHNOLOGY STUDENT DRESS CODE
Students who attend FMTC shall dress in a manner appropriate for the job in which they are receiving training, including any special protective gear and professional uniforms. All clothing must be neither distracting nor offensive and be clean, neat, modest, in good repair, and appropriately sized.

Administration has the final authority for determining whether or not a student’s apparel conforms to the dress code. When it is determined that it does not, students will be required to change into appropriate clothing.

Dress Code/Uniforms Required: Program designated uniform: collared shirts (buttoned and tucked into pants at waist), slacks (no jeans), appropriate length skirts or dresses, sleeved blouses or shirts, appropriate shoes (no soft top or tennis shoes) fully laced. All students read, agree to abide by the rules, and sign the dress code policy.
OCP DESCRIPTIONS

Occupational Completion Point A – Basic Electronics Troubleshooter
Course #AVS0095
01.0 Demonstrate proficiency in Soldering and Basic Laboratory Practices
02.0 Demonstrate proficiency in Basic Direct Current (DC) Circuits
03.0 Demonstrate Employability Skills
04.0 Demonstrate an understanding of Entrepreneurship
05.0 Demonstrate proficiency in knowledge of Basic Computer Usage
06.0 Demonstrate proficiency in advanced DC Circuits
07.0 Demonstrate proficiency in AC Circuits

Occupational Completion Point B – ELECTRONICS EQUIPMENT REPAIRER
Course #EER006
08.0 Demonstrate proficiency in Analog Circuits
09.0 Demonstrate proficiency in Solid State Devices
10.0 Demonstrate proficiency in Digital Circuits
11.0 Demonstrate proficiency in Fundamental Micro-Processors
12.0 Demonstrate appropriate understanding of Basic Math Skills
13.0 Demonstrate an understanding of Basic Science Skills
14.0 Demonstrate skills in Technical Recording
15.0 Demonstrate appropriate Communication Skills

Occupational Completion Point C – (1 of 2) BIOMEDICAL ELECTRONICS TROUBLESHOOTER 1
Course #EER0090
16.0 Demonstrate proficiency with Transistor Pulse Amplifiers
17.0 Demonstrate proficiency with Trigger Device Circuits
18.0 Demonstrate proficiency with Operational Amplifiers
19.0 Demonstrate proficiency in knowledge of Electromagnetics
20.0 Demonstrate proficiency with Fiber optic Applications
21.0 Demonstrate proficiency in DC Motor Systems
22.0 Demonstrate proficiency with Motor Control Systems
23.0 Demonstrate an understanding of Safety Concepts and Best Practices
24.0 Demonstrate appropriate understanding of The Human Machine
25.0 Demonstrate an understanding of Monitoring Systems
26.0 Compile and compare data through the usage of Basic Monitoring Equipment
27.0 Demonstrate proficiency with Medical Support Equipment
28.0 Demonstrate proficiency with Motors
29.0 Demonstrate proficiency with Power Systems
30.0 Demonstrate proficiency with Laboratory Equipment
31.0 Demonstrate Proficiency with Sterilization Equipment

Occupational Completion Point C – (2 of 2) BIOMEDICAL ELECTRONICS REPAIR TECHNICIAN
Course #EER0091
32.0 Demonstrate an understanding of Sound Imaging Systems
33.0 Demonstrate proficiency with Radiographic Imaging Systems
34.0 Demonstrate proficiency with Nuclear Imaging Systems
35.0 Demonstrate proficiency with Impedance Tomography Systems
36.0 Demonstrate proficiency with Life Support Systems
37.0 Demonstrate proficiency with Respiratory Systems
38.0 Demonstrate proficiency with Cardio Systems
39.0 Demonstrate proficiency with Renal Systems
40.0 Demonstrate proficiency with Incubators
41.0 Demonstrate proficiency with Biomedical Optic Systems
42.0 Demonstrate proficiency with Surgical Support Systems
43.0 Demonstrate proficiency using Biomedical Information Systems

**Occupational Completion Point D – (1 of 2) MEDICAL IMAGING EQUIPMENT 1**

Course #EER0092
44.0 Graphically illustrate an understanding of Anatomy
45.0 Reinforce knowledge of Medical Terminology
46.0 Demonstrate proficiency in Computer Communication
47.0 Demonstrate understanding and knowledge of Electro/Mechanical Safety
48.0 Demonstrate understanding of Picture Archive Communication Systems
49.0 Demonstrate understanding knowledge of Diagnostic Ultrasound Equipment
50.0 Demonstrate proficiency in Building Wiring
51.0 Demonstrate proficiency in Basic Radiographic Equipment
52.0 Demonstrate Proficiency in Film Processing

**Occupational Completion Point D – (2 of 2) BIOMEDICAL IMAGING EQUIPMENT TECHNICIAN**

Course #EER0093
53.0 Demonstrate proficiency in Test Equipment
54.0 Demonstrate an understanding of Magnetic Resonance Imaging
55.0 Demonstrate understanding and knowledge of Computed Tomography
56.0 Demonstrate an understanding of Nuclear Medicine
57.0 Demonstrate an understanding of Codes and Regulations Applications
58.0 Demonstrate proficiency in Troubleshooting
59.0 Demonstrate proper application of Radiation Safety
60.0 Demonstrate an understanding and knowledge of Radiation Physics
61.0 Demonstrate proficiency in Linear Accelerators

**JOB DESCRIPTIONS**

All students are strongly encouraged to become full program completers and become certified biomedical electronics technicians by passing the Electronics Technicians Association International certification test. In cases where students are unable to complete the entire program the following opportunities are available:

**OCP A** **Basic Electronics Troubleshooter (150 Hours)**
Students completing OCP A will be able to obtain employers as troubleshooters of AC and DC circuits for firms in the electronics industry.

**OCP B** **Electronics Equipment Repairer (150 Hours)**
Students working as electronic equipment repairer would be able to follow established test procedures ensuring that both incoming purchased parts and manufactured parts meet engineering specifications. They will be able to maintain quality control performance charts and write detailed reports for managements review.

**OCP C** **(1of 2) Biomedical Electronics Troubleshooter 1 (150 Hours)**
A completer of biomedical electronics troubleshooter would be able to perform the tasks of an electronics troubleshooter or an electronics equipment repairer plus be able to troubleshoot and repair electronic/mechanical equipment. They would also be able to meet with customers and vendors to discuss repairs or necessary circuit revisions.
OCP C (2 of 2) Biomedical Repair Technician (150 Hours)
A completer of biomedical repair technician would be able to perform the tasks of an electronics troubleshooter or an electronics equipment repairer plus be able to troubleshoot and repair electronic/mechanical and medical equipment. They would also be able to meet with customers and vendors to discuss repairs or necessary circuit revisions.

OCP D (1 of 2) Medical Imaging Equipment 1 (270 Hours)
A medical imaging equipment 1 would have the understanding of electronics, circuits: medical terminology, and advance imaging techniques. They would have excellent organizational skills, be able to train team members and possess leadership capabilities.

OCP D (2 of 2) Biomedical Imaging Equipment Technician (270 Hours)
A biomedical imaging equipment technician would have the understanding of advanced electronics, circuits: medical terminology, and advance imaging techniques. They would have excellent organizational skills, be able to train team members and possess leadership capabilities.

TEXTBOOKS
For the most recent book list for the Biomedical Equipment Repair Technology program, visit FMTC’s online bookstore – www.fmtcshop.com. (Do not purchase books for future semesters, only for CURRENT semester).

REQUIRED MATERIALS
Paper, pencils, pens, erasers.

PROGRAM OBJECTIVES
See the attached Florida Department of Education Curriculum Frameworks for program objectives and competencies.
**Program Title:** Biomedical Equipment Repair Technology  
**Program Type:** Career Preparatory  
**Career Cluster:** Manufacturing

**Purpose**

The purpose of this program is to prepare students for employment as biomedical equipment repair technicians. This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Manufacturing career cluster: provides technical skill proficiency, and includes competency- based applied learning that contributes to the academic knowledge, higher order reasoning and problem- solving skills, work attitudes, general employability skills, technical skills, and occupation- specific skills and knowledge of all aspects of the manufacturing career cluster.

**Biomedical Equipment Repair** Medical equipment repairers, also known as biomedical equipment technicians (BMETs), repair a wide range of electronic, electromechanical, and hydraulic equipment used in hospitals and health practitioners' offices. ... Much of the equipment that they maintain and repair uses specialized test-equipment software. A biomedical equipment technician repairs, maintains and calibrates medical machinery. The job is highly technical and constantly evolving due to the fact that equipment technology expands rapidly.
Program Structure
This program is a planned sequence of instruction consisting of four occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

Common Career Technical Core – Career Ready Practices
Career Ready Practices describes the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

1. Act as a responsible and contributing citizen and employee.
2. Apply appropriate academic and technical skills.
3. Attend to personal health and financial well-being.
4. Communicate clearly and effectively and with reason.
5. Consider the environmental, social and economic impacts of decisions.
6. Demonstrate creativity and innovation.
7. Employ valid and reliable research strategies.
8. Utilize critical thinking to make sense of problems and persevere in solving them.
9. Model integrity, ethical leadership and effective management.
10. Plan education and career paths aligned to personal goals.
11. Use technology to enhance productivity.
12. Work productively in teams while using cultural global competence.
Standards

After successfully completing this program, the student will be able to perform the following:

01.0 Demonstrate proficiency in Soldering and Basic Laboratory Practices
02.0 Demonstrate proficiency in Basic Direct Current (DC) Circuits
03.0 Demonstrate Employability Skills
04.0 Demonstrate an understanding of Entrepreneurship
05.0 Demonstrate proficiency in knowledge of Basic Computer Usage
06.0 Demonstrate proficiency in advanced DC Circuits
07.0 Demonstrate proficiency in AC Circuits
08.0 Demonstrate proficiency in Analog Circuits
09.0 Demonstrate proficiency in Solid State Devices
10.0 Demonstrate proficiency in Digital Circuits
11.0 Demonstrate proficiency in Fundamental Micro-Processors
12.0 Demonstrate appropriate understanding of Basic Math Skills
13.0 Demonstrate an understanding of Basic Science Skills
14.0 Demonstrate skills in Technical Recording
15.0 Demonstrate appropriate Communication Skills
16.0 Demonstrate proficiency with Transistor Pulse Amplifiers
17.0 Demonstrate proficiency with Trigger Device Circuits
18.0 Demonstrate proficiency with Operational Amplifiers
19.0 Demonstrate proficiency in knowledge of Electromagnetics
20.0 Demonstrate proficiency with Fiber optic Applications
21.0 Demonstrate proficiency in DC Motor Systems
22.0 Demonstrate proficiency with Motor Control Systems
23.0 Demonstrate an understanding of Safety Concepts and Best Practices
24.0 Demonstrate appropriate understanding of The Human Machine
25.0 Demonstrate an understanding of Monitoring Systems
26.0 Compile and compare data through the usage of Basic Monitoring Equipment
27.0 Demonstrate proficiency with Medical Support Equipment
28.0 Demonstrate proficiency with Motors
29.0 Demonstrate proficiency with Power Systems
30.0 Demonstrate proficiency with Laboratory Equipment
31.0 Demonstrate Proficiency with Sterilization Equipment
32.0 Demonstrate an understanding of Sound Imaging Systems
33.0 Demonstrate proficiency with Radiographic Imaging Systems
34.0 Demonstrate proficiency with Nuclear Imaging Systems
35.0 Demonstrate proficiency with Impedance Tomography Systems
36.0 Demonstrate proficiency with Life Support Systems
37.0 Demonstrate proficiency with Respiratory Systems
38.0 Demonstrate proficiency with Cardio Systems
39.0 Demonstrate proficiency with Renal Systems
40.0 Demonstrate proficiency with Incubators
41.0 Demonstrate proficiency with Biomedical Optic Systems
42.0 Demonstrate proficiency with Surgical Support Systems
43.0 Demonstrate proficiency using Biomedical Information Systems
44.0 Graphically illustrate an understanding of Anatomy
45.0 Reinforce knowledge of Medical Terminology
46.0 Demonstrate proficiency in Computer Communication
47.0 Demonstrate understanding and knowledge of Electro/Mechanical Safety
48.0 Demonstrate understanding of Picture Archive Communication Systems
49.0 Demonstrate understanding knowledge of Diagnostic Ultrasound Equipment
50.0 Demonstrate proficiency in Building Wiring
51.0 Demonstrate proficiency in Basic Radiographic Equipment
52.0 Demonstrate Proficiency in Film Processing
53.0 Demonstrate proficiency in Test Equipment
54.0 Demonstrate an understanding of Magnetic Resonance Imaging
55.0 Demonstrate understanding and knowledge of Computed Tomography
56.0 Demonstrate an understanding of Nuclear Medicine
57.0 Demonstrate an understanding of Codes and Regulations Applications
58.0 Demonstrate proficiency in Troubleshooting
59.0 Demonstrate proper application of Radiation Safety
60.0 Demonstrate an understanding and knowledge of Radiation Physics
61.0 Demonstrate proficiency in Linear Accelerators
